## PROJECTS

<b>Air-Gloss (E-Commerce Application)</b> An online platform for purchasing car and home fragrances, cleaning and polishing accessories, and office refreshers. Built secure API integrations and smooth UI for seamless user experience.	<i>React.js, Node.js, Express.js, MySQL</i>
<b>Job Portal (Candidate/Recruiter Modules)</b> Built two separate interfaces — one for candidates to browse and apply for jobs and another for recruiters to post and manage job listings. Handled form validation, session management, and API design.	<i>React.js, Node.js, Express.js, MySQL</i>
<b>Aala-Cabs (Ride Booking App)</b> A two-sided app (Customer Driver) for booking and tracking cabs in real time. Implemented push notifications, payment gateway, and route tracking via Google Maps. Deployed for both Android and iOS.	<i>Flutter, Dart, Node.js, Firebase, Google Maps</i>
<b>Bus Tracking System</b> A real-time tracking solution for college buses with separate interfaces for students, drivers, and teachers. Used Firebase Realtime DB and Google Maps API for accurate tracking.	<i>Flutter, Node.js, Firebase, MySQL</i>
<b>Gareeb-HRMS Web App</b> Developed UI for employee HRMS. Created authentication APIs and implemented secure CRUD operations for employee records.	<i>React.js, Node.js, Express.js, MySQL</i>
<b>ItaxEasy (Tax Assistant App)</b> Modules include: <ul style="list-style-type: none"><li>GSTIN search by PAN or GSTIN Number</li><li>ITR status tracking and e-verification</li><li>Linking and verifying Aadhaar and PAN</li><li>MCA and bank locator services</li></ul> Available for Android iOS platforms.	<i>Flutter, Node.js, Firebase, MySQL</i>
